

iRobot Roomba 870 Caster Wheel Replacement

iRobot Roomba 870 Caster Wheel Replacement: How to replace the caster wheel on your Roomba if it becomes stuck or breaks.

Written By: Andrew Cabri

INTRODUCTION

The caster wheel aids the Roomba's maneuverability, this includes moving and turning the robot around corners. Caster wheel needs to be cleaned if dirt gets stuck on it. However, if the caster wheel is broken, replacement is recommended.

Step 1 — Caster Wheel

- Flip the Roomba on its back so that the wheels are facing up.

Step 2

- Grip the caster wheel and pull it firmly out of its socket.

To reassemble your device, follow these instructions in reverse order.
